If you want to learn Spanish, it’s important for you to learn the Spanish alphabet. You need to learn the proper pronunciation of each letter of the alphabet. Then you are ready to study the language.

Many of the rules and punctuation in the Spanish language are a combination of Latin and Arabic languages. For this reason, if you’re first language is based on these languages, learning Spanish will be easier. The alphabet uses the Latin alphabet with a few variations.

Some of the variations on the Latin alphabet include:

- There are vowels both with and without accents
- The vowels with the accents are a variation of the unaccented vowel.
- The letter n is used with or without a tilde. Each of these variations is considered to be a separate letter.
- The diagraphs ll and ch are considered separate letters in the alphabet.

Letters and Pronunciation of the Spanish Alphabet

Letters and Pronunciations

The letter is listed to the left, with the pronunciation of each letter:

A is pronounced /a/
B is pronounced /b/
C is pronounced /se/
Ch is pronounced /che/
D is pronounced /de/
E is pronounced /e/
F is pronounced /efe/
G is pronounced /ge/ or /he/
H is pronounced /hache/
I is pronounced /i/
J is pronounced /jota/ or /hota/
K is pronounced /ka/

V is pronounced /uve/ or /w/
W is pronounced doble ve or doble u
X is pronounced /ekis/ or /ks/
Y is pronounced /ye/
Z is pronounced /zeta/ or /seta/

If you speak English, you will find that much of the pronunciation is similar to what you find in the English alphabet. For example, the letter C has two sounds like it does in English. The letter C can sound like either a K or an S.

There are some letters that make the sounds of other letters in the English language. The letter j sounds like the letter h in English. The letter V sounds like the letter B. The letter Z sounds like the letter S. The letter R in Spanish makes a rolling R sound that is somewhat similar to the English pronunciation.

Other Information About the Spanish Alphabet

The vowel accents in the Spanish language serve two purposes. The first purpose is for marking the stress. This helps with pronunciation when you are first learning the language. The other purpose is to differentiate between words.
